DETAILED ACTION

Drawings

New FORMAL drawings in compliance with 37 CFR 1.121(d) are required in this application. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The formal drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-25 are allowed.

The following is an examiner's statement of reasons for allowance: with respect to claim 1, the prior art failed to teach or render obvious the claimed "optical filter element disposed in said third optical path for separating the ground reflections of said third optical path into first and second portions that are dependent on the Doppler wavelength shift of said ground reflections; and processing means for determining altitude and ground velocity of said aircraft based on said first and second portions". With respect to claims 12 and 18, the prior art failed to teach or render obvious the claimed "an optical filter element disposed in said third optical path for separating the reflections of said third optical path into first and second portions that are dependent on the Doppler wavelength shift of said reflections; and light detection means for receiving

said first and second portions and generating first and second signals representative of said first and second portions, respectively". The prior art teaches laser radars including optics to form a telescope with the field of view and filters to filter unwanted signals (noises). However, none of the prior art either singularly or in combination teaches the claimed system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
